## QUESTIONNAIRE ON THE USE OF IT IN THE OPERATION OF THE SERVICE CONVENTION

---

[NAME of STATE or territorial unit:]

REPUBLICA DE NICARAGUA

1.1 To what extent is Your State in favour of the use of information technology to facilitate the operation of the Service Convention?  
Strongly in favour

1.1 To what extent is Your State in favour of the use of information technology to facilitate the operation of the Service Convention?  
- comment

Sin embargo nuestra Legislación nos remite a que la primera notificación se realice de manera personal Ley 902 CPC "Artículo 148 Notificación La primera notificación se realizará personalmente en el domicilio señalado por la parte actora, a quién deba comparecer en el proceso. El funcionario o funcionaria, secretario o secretaria judicial que deba realizar la diligencia, concurrirá al mismo y si hallare a la persona que deba notificar, le entregará la copia de la resolución y las copias de los escritos y anexos que correspondan. De dicha actuación se dejará constancia a través de acta..."

1.2 Is the transmission by electronic means of requests for service possible under the internal law of Your State?  
Yes

1.2 Is the transmission by electronic means of requests for service possible under the internal law of Your State? - comment  
Nuestra Ley 902 CPC "Artículo 153 Notificación por medios telemáticos Sin menoscabo del derecho de defensa, las partes una vez personadas en el proceso, podrán señalar cualquier medio telemático para ser notificadas de las comunicaciones, sea por carta certificada, telegrama, telefax o cualquier otro medio electrónico de comunicación, que permita dejar en los autos constancia fehaciente de haberse recibido la notificación, de la fecha de su recepción y de su contenido. El funcionario o funcionaria, secretario o secretaria dará fe en el expediente de la remisión y del contenido de lo remitido, y agregando el acuse de recibo o el medio a través del cual quede constancia de la recepción. De ser así, el plazo correrá a partir del recibimiento de la comunicación, según lo acredite el correo o la oficina de transmisión. También podrá notificarse mediante otros sistemas autorizados, siempre que no causen indefensión.

y Ley 870 CF "Arto 514 Toda resolución judicial debe ser notificada a las partes o a sus apoderados, con entrega de cédula de notificación que contenga la resolución respectiva o en la audiencia correspondiente. En el primer escrito que presenten las partes o intervinientes en el proceso indicarán un lugar para emplazamientos y notificaciones. La autoridad judicial mandará a subsanar de oficio, si advirtiere la omisión de este requisito. El juez o jueza podrá aceptar la proposición, que le hagan las partes, de formas especiales de notificación que el desarrollo tecnológico permita, como pueden ser los medios electrónicos, en cuyo caso, el acto se tendrá por notificado veinticuatro horas de su realización o envío."

Please provide the specific provision/s:

1.3 Is the execution by electronic means of requests for service possible under the internal law of Your State?  
Yes

1.3 Is the execution by electronic means of requests for service possible under the internal law of Your State? - comment

Please provide the specific provision/s:

1.4 Is Your State party to any bilateral or multilateral agreements, other than the Service Convention, which provide for the use electronic means in the transmission or execution of requests for service?

Oui

1.4 Is Your State party to any bilateral or multilateral agreements, other than the Service Convention, which provide for the use electronic means in the transmission or execution of requests for service? - comment

Please provide the specific provision/s:

1.5 Has Your State encountered any challenges regarding the use of information technology to facilitate the operation of the Service Convention?

No

[Internal law limitations]

No

[Judicial or administrative structures]

No

[Implementation challenges (e.g. lack of resources)]

No

[Costs]

No

[Selection of the appropriate technology]

No

[System interoperability / compatibility]

No

[Security concerns]

No

[Cooperation with other Contracting Parties]

No

[Other Challenges]

No

Please specify:

1.6 To what extent would Your State be in favour of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention?

Strongly in favour

Please explain your reasoning, if possible:

consideramos que se necesitan definir los términos y condiciones para establecer la Implementación de la plataforma electrónica.

---

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Internal law limitations]

No

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Judicial or administrative structures]

No

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Implementation challenges (e.g. lack of resources)]

Yes

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Costs]

Yes

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Selection of the appropriate technology]

Yes

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [System interoperability / compatibility]

Yes

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Security concerns]

Yes

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Cooperation with other Contracting Parties]

No

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Service Convention? [Other challenges]

No

Please specify:

1.8 What is the status of the use of information technology in Your State for the transmission of requests for service under the main channel (i.e. to the Central Authority, Art. 5(1)(a))?

Implementation in progress

1.9 What is the status of the use of information technology in Your State for the transmission of requests for service under the alternative channels (Art. 10)? [Art. 10(a)]

Fully implemented and operational

1.9 What is the status of the use of information technology in Your State for the transmission of requests for service under the alternative channels (Art. 10)? [Art. 10(b)]

Implementation in progress

1.9 What is the status of the use of information technology in Your State for the transmission of requests for service under the alternative channels (Art. 10)? [Art. 10(c)]

Not applicable

1.10 What type of electronic transmission does Your State use, or would consider using for requests for service under the main channel?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [E-mail (regular)]

---

Yes

1.10 What type of electronic transmission does Your State use, or would consider using for requests for service under the main channel?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [E-mail (secured/encrypted)]

No

1.10 What type of electronic transmission does Your State use, or would consider using for requests for service under the main channel?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic transmission platform administered by a public/State authority]

No

1.10 What type of electronic transmission does Your State use, or would consider using for requests for service under the main channel?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic transmission platform administered by a private service provider]

No

1.10 What type of electronic transmission does Your State use, or would consider using for requests for service under the main channel?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic transmission using digital ledger technology]

No

1.10 What type of electronic transmission does Your State use, or would consider using for requests for service under the main channel?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Other]

No

Please provide details:

1.11 On average, approximately what percentage of requests for service transmitted electronically by other Contracting Parties does Your State accept?

(Please round the estimated percentage down, if applicable)

Not applicable

---

1.12 Since 2014, on average, approximately what percentage of requests for service received by Your State were transmitted electronically by forwarding authorities of other Contracting Parties?

(Please round the estimated percentage down, if applicable)

Not applicable

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [2014:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [most received from:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [2015:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [most received from:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [2016:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [most received from:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [2017:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [most received from:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [2018:]

If possible, please provide the number of requests for service that were received per year, and the name(s) of the main Contracting Parties from which these were received: [most received from:]

1.13 If the Central Authority of Your State has received requests for service transmitted electronically under the Service Convention, on average, what percentage of the documents received are subsequently served electronically?

(Please round the estimated percentage down, if applicable)

Not applicable

If possible, please provide details as to how the documents are subsequently served:

1.14 What is the status of the implementation of an electronic case management system in Your State for incoming and outgoing requests for service issued pursuant to the Service Convention?

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases).

---

Under consideration

1.15 What type of electronic case management system does Your State use, or would consider using for incoming and outgoing requests for service issued pursuant to the Service Convention?

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases).

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT.

Case management system administered by a public/State authority

Please provide details:

La Autoridad Central cuenta con un sistema conocido como NICARAO.

1.16 If Your State uses an electronic case management system for incoming and outgoing requests for service issued pursuant to the Service Convention, which of the following best describes the system?

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases).

Fully electronic system (requests for service stored electronically, electronic display of the progress of the forwarded or received requests for service etc.)

1.16 If Your State uses an electronic case management system for incoming and outgoing requests for service issued pursuant to the Service Convention, which of the following best describes the system?

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases). - comment

En consideración anexar el modulo del Convenio de Notificaciones

1.17 In 2018, on average, approximately what percentage of requests for service received by Your State under the Service Convention led to service being performed/effectuated using information technology?

(Please round the estimated percentage down, if applicable)

Not applicable

1.18 When competent authorities of Your State execute requests for service transmitted electronically by another Contracting Party under the Service Convention, in approximately what percentage of instances is the certificate of service then returned electronically to the applicant (Art. 6)?

(Please round the estimated percentage down, if applicable)

Not applicable

If possible, please provide details as to how the certificate of service establishing execution is returned:

1.19 In 2018, what was the approximate percentage (on average) of requests received by Your State in which the foreign forwarding authority requested service be performed electronically under the Service Convention (Art. 5 (1) b)?

(Please round the estimated percentage down, if applicable)

Not applicable

---

If possible, please provide the following details: [Number of such requests:]

If possible, please provide the following details: [Main Contracting Parties from which such requests were received:]

Technology(ies) requested:

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by private e-mail]

No

Technology(ies) requested:

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by private social media account]

No

Technology(ies) requested:

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by public/State-administered email account]

No

Technology(ies) requested:

by each of the following methods (under (Art. 5 (1) b)?)

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Service using distributed ledger technology]

Other (Please specify):

Consideramos que si, siempre y cuando no sea incompatible con nuestro Derecho Interno.

1.21 If Your State refuses requests from other Contracting Parties to use information technology in performing service on your territory, what is/are the main reason/s for such a refusal? [Use of technology is prohibited by internal law]

No

1.21 If Your State refuses requests from other Contracting Parties to use information technology in performing service on your territory, what is/are the main reason/s for such a refusal? [Use of technology is not provided for in internal law]

No

1.21 If Your State refuses requests from other Contracting Parties to use information technology in performing service on your territory, what is/are the main reason/s for such a refusal? [Use of technology is not possible as there is no compatible system in Your State]

No

1.21 If Your State refuses requests from other Contracting Parties to use information technology in performing service on your territory, what is/are the main reason/s for such a refusal? [Use of technology is too resource-intensive]

No

1.21 If Your State refuses requests from other Contracting Parties to use information technology in performing service on your territory, what is/are the main reason/s for such a refusal? [The authority/ies lacks familiarity with the use of the requested technology]

No

1.21 If Your State refuses requests from other Contracting Parties to use information technology in performing service on your territory, what is/are the main reason/s for such a refusal? [Other]

Yes

Please Specify:

Consideramos que si, siempre y cuando no sea incompatible con nuestro Derecho Interno.

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by private e-mail]

Yes

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by private social media account]

No

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions

---

and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by public/State-administered email account]

No

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Service by electronic platform of a private provider]

No

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Service by electronic platform of a public/State authority]

No

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Service using distributed ledger technology]

No

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Other]

No

1.22 If Your State performs service electronically, what type of information technology is used?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Not applicable]

No

If possible, please provide additional information, e.g. including the methods used, relevant security standards and acknowledgement of receipt mechanisms:

1.23 In 2018, what was, on average, the approximate percentage of requests sent by Your State in which your forwarding authority requested service be performed electronically under the Service Convention (Art. 5(1) b))?

(Please round the estimated percentage down, if applicable)

Not applicable

If possible, please provide the following details: [Number of such requests:]

---

If possible, please provide the following details: [Main Contracting Parties to which such requests were sent:]

Technology(ies) requested:

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [Electronic service by private e-mail]

No

General Satisfaction

2.1 How does Your State rate the general operation of the Service Convention?

Not applicable

General Satisfaction

2.1 How does Your State rate the general operation of the Service Convention? - comment

Outside of the Service Convention

---

2.2 Outside the Service Convention, what is the applicable procedure if an interested person from another jurisdiction wishes to perform service on someone located in the territory of Your State? [Procedure provided by internal law]

Yes

Outside of the Service Convention

2.2 Outside the Service Convention, what is the applicable procedure if an interested person from another jurisdiction wishes to perform service on someone located in the territory of Your State? [Procedure provided by bilateral agreement(s)]

No

Outside of the Service Convention

2.2 Outside the Service Convention, what is the applicable procedure if an interested person from another jurisdiction wishes to perform service on someone located in the territory of Your State? [Procedure provided by multilateral agreement(s)]

No

Outside of the Service Convention

2.2 Outside the Service Convention, what is the applicable procedure if an interested person from another jurisdiction wishes to perform service on someone located in the territory of Your State? [Other procedure (such as consular channels)]

No

Please provide details (including full reference to the applicable legislation or caselaw):

Ley 902 CPC "Artículo 148 Notificación La primera notificación se realizará personalmente en el domicilio señalado por la parte actora, a quién deba comparecer en el proceso. El funcionario o funcionaría, secretario o secretaria judicial que deba realizar la diligencia, concurrirá al mismo y si hallare a la persona que deba notificar, le entregará la copia de la resolución y las copias de los escritos y anexos que correspondan. De dicha actuación se dejará constancia a través de acta. De no encontrarse la persona en su domicilio, el funcionario o funcionaría, secretario o secretaria judicial, dejará constancia de ello y concurrirá por segunda vez en el término de tercero día y si la encontrare procederá, conforme el párrafo anterior, en caso contrario deberá proceder a notificar por medio de cédula."

y Artículo 153 "Notificación por medios telemáticos Sin menoscabo del derecho de defensa, las partes una vez personadas en el proceso, podrán señalar cualquier medio telemático para ser notificadas de las comunicaciones, sea por carta certificada, telegrama, telefax o cualquier otro medio electrónico de comunicación, que permita dejar en los autos constancia fehaciente de haberse recibido la notificación, de la fecha de su recepción y de su contenido. El funcionario o funcionaria, secretario o secretaria dará fe en el expediente de la remisión y del contenido de lo remitido, y agregando el acuse de recibo o el medio a través del cual quede constancia de la recepción. De ser así, el plazo correrá a partir del recibimiento de la comunicación, según lo acredite el correo o la oficina de transmisión. También podrá notificarse mediante otros sistemas autorizados, siempre que no causen indefensión.

y Ley 870 CF " arto 514 Toda resolución judicial debe ser notificada a las partes o a sus apoderados, con entrega de cédula de notificación que contenga la resolución respectiva o en la audiencia correspondiente. En el primer escrito que presenten las partes o intervinientes en el proceso indicarán un lugar para emplazamientos y notificaciones. La autoridad judicial mandará a subsanar de oficio, si advirtiere la omisión de este requisito. El juez o jueza podrá aceptar la proposición, que le hagan las partes, de formas especiales de notificación que el desarrollo tecnológico permita, como pueden ser los medios electrónicos, en cuyo caso, el acto se tendrá por notificado veinticuatro horas de su realización o envío."
