[Cooperation with other Contracting Parties]

Yes

[Other Challenges]

No

Please specify:

1.6 To what extent would Your State be in favour of a common electronic platform to be used by all Contracting Parties for the operation of the Evidence Convention?

Strongly in favour

Please explain your reasoning, if possible:

unity, standardization, efficiency.

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Evidence Convention? [Internal law limitations]

No

1.7 What, if any, particular challenges does Your State envisage in relation to the possible use of a common electronic platform to be used by all Contracting Parties in the operation of the Evidence Convention? [Other challenges]

Yes

Please specify:

* For the sake of unity and order, we believe that the HCCH should facilitate the use of a common electronic platform.

* the system would have to support the uploading and storage of large files - we sometimes receive several boxes of documents per request.

* for the sake of efficient, the system would have to be simple for use.

* How will the fee issue be addressed (since different Contracting States have different fees in relation to the execution of requests)?

1.8 What is the status of the use of information technology in Your State for the transmission of Letters of Request under the Evidence Convention?

Final stages of implementation

1.9 What type of electronic transmission does Your State use, or would consider using for Letters of Request under the Evidence Convention?

Distributed ledger technology (DLT): A database held by participants (or nodes) in a decentralised network, where transactions and records are processed, saved and replicated by each node independently and shared with the other nodes, seeking to validate the transaction by achieving consensus on its authenticity. Blockchain is perhaps one of the most well-known of the various forms of DLT. [E-mail (regular)]

Please provide details:

In Israel, we are currently using secured E-mail for the transmission of Letters of Request, but in the near future (several weeks) we will launch an electronic transmission platform administered by the Central and Competent Authority.

1.10 On average, approximately what percentage of Letters of Request transmitted electronically by other Contracting Parties does Your State accept?

1.12 If the Central Authority of Your State has received Letters of Request transmitted electronically under the Evidence Convention, on average, approximately what percentage of these Letters of Request are subsequently forwarded electronically to the competent judicial authority for execution?

(Please round the estimated percentage down, if applicable)

0%

If possible, please provide details as to how the documents establishing execution are forwarded:

1.13 What is the status of the implementation an electronic case management system in Your State for incoming and outgoing Letters of Request issued pursuant to the Evidence Convention?

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases).

Not (yet) under consideration

1.14 What type of electronic case management system does Your State use, or would consider using for incoming and outgoing Letters of Request issued pursuant to the Evidence Convention?

Case management system administered by a public/State authority

Please provide details:

At the time being, the options specified beyond the case management system administered by a public/State authority, still require further consultations prior to their consideration in Israel.

1.15 If Your State uses an electronic case management system for incoming and outgoing Letters of Request issued pursuant to the Evidence Convention, which of the following best describes the system?

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases).

Electronic case management system: A system that enables casework and related workflows to be followed and managed through electronic communication of information between the individuals concerned (incl. staff, as well as parties and their representatives in some cases). - comment

As explained, at the moment there is no electronic case management system in Israel. However, the system which we intend to launch in several weeks, will be a fully electronic system.

1.16 In 2018, on average, approximately what percentage of Letters of Request received by Your State under the Evidence Convention were executed using information technology?

(Please round the estimated percentage down, if applicable)

0%

1.17 When competent authorities of Your State execute Letters of Request transmitted electronically by another Contracting Party under the Evidence Convention, on average, in approximately what percentage of such instances are documents establishing the execution of the Letter of Request returned electronically to the requested authority (Art. 13)?

(Please round the estimated percentage down, if applicable)

0%

If possible, please provide details as to how the documents establishing execution are returned:

1.18 In 2018, what was the approximate percentage (on average) of Letters of Request received by Your State in which the use of information technology was requested in the taking of evidence under the Evidence Convention?
