**“address” must include a geographical
nexus – Art 1(2)**

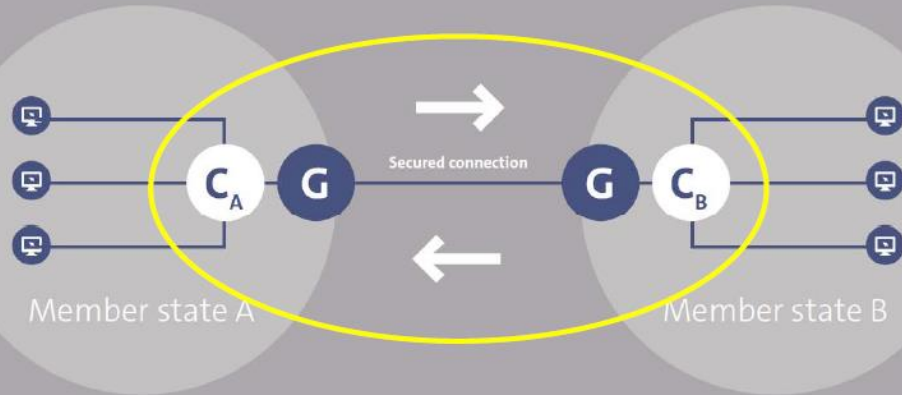

e-service infrastructure attached to the territory of State Parties

preserve national investments by
connecting instead of replacing

e-CODEX / Technical infrastructure

C Connector **G** Gateway Back-end application

e-codex.eu

subsidiarity and semantic interoperability

due to different legal, financial, and cultural obstacles State Parties need, to some degree, to be progressing at different speeds

Art. 14a EU Service Regulation Proposal
“Service [...] may be effected directly
[...] by electronic methods available
under the law of the forum Member
State for the domestic service of
documents, [...]”
