

### Categories of e-Registers

This chart identifies the different categories of e-Registers that Competent Authorities have implemented, or may wish to implement, as part of the e-APP.

For good practices on the implementation and operation of e-Registers, refer to the Conclusions & Recommendations of the various International e-APP Fora. Because of their limited functionality, Category 1 e-Registers are not considered to reflect best practices. Competent Authorities are encouraged to implement Category 2 or 3 e-Registers.

Functionality	Category	Information displayed
Basic	①	"Yes" / "No" ( <i>i.e.</i> , mere confirmation that an Apostille matching the particulars entered by the user was issued, but no confirmation that the Apostille is being used with the public document for which it was issued)
Additional	②	"Yes" / "No" + information on Apostille and/or underlying public document (possibly visual check)
Advanced	③	"Yes" / "No" + information on Apostille and/or underlying public document (possibly visual check) + digital verification of Apostille and/or underlying public document
